# GasMultiBloc® Combined regulator and safety shut-off valves Two-stage function

MB-ZRD(LE) 405 - 412 B01

7.24

### **Technical description**

The DUNGS GasMultiBloc® integrates filter, regulator, valves and pressure switches in one compact fitting.

- Dirt trap: Fine-mesh sieve
- One regulator and two main valves: B01
- One one-stage valve and one two-stage valve
- One valve is fast opening, one valve is slow or fast opening
- Solenoid valves up to 360 mbar (36 kPa) as per DIN EN 161 Class A Group 2
- Sensitive setting of output pressure by proportional regulator as per DIN EN 88 Class A Group 2
- High flow rates with low pressure drop
- DC solenoid drive interference degree N
- Main volume restrictor and partial volume restrictor at valve V2
- Hydraulic opening delay
- Flange connections with pipe threads as per ISO 7/1
- Simple mounting, compact, light-weight

The modular system permits individual solutions by using external ignition gas tap in connection with separately controlled valves, by adding a valve proving system, mini/maxi pressure switches, pressure limiters, limit switch and closing stroke limiter at valve V2, regulator blocking for liquid gas applications.

## **Application**

The modular system permits individual solutions in gas safety and regulator engineering. Suitable for gases of families 1, 2, 3 and other neutral gaseous media.

### **Approvals**

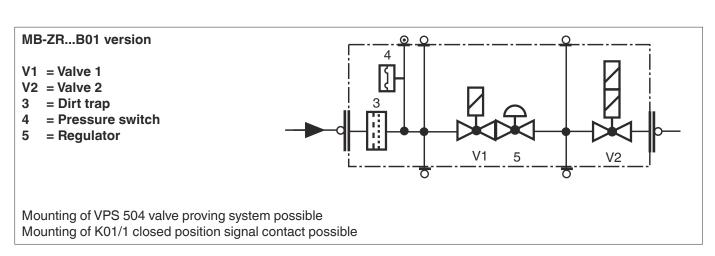

EU type testing certificate as per:

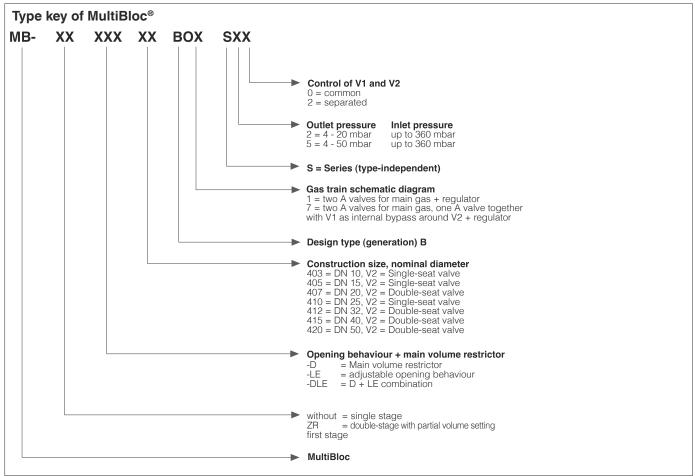

- EU-Gas Appliances Regulation
- EU-Pressure Equipment Directive Approvals in other important gas consuming countries.

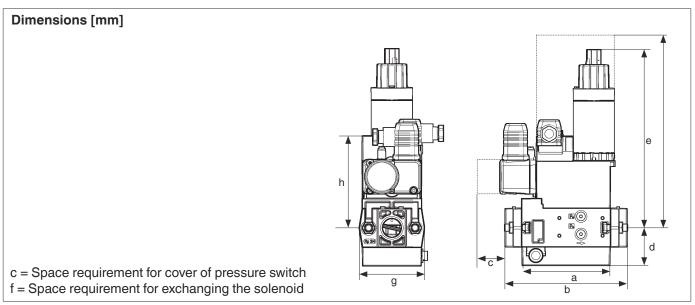

# **Specifications**

Max. operating pressure         360 mbar (36 kPa)           Output pressure ranges         MB \$20/\$22 p₂* 4 mbar (0.4 kPa) to 50 mbar (2 kPa) MB \$50/\$52 p₂* 4 mbar (0.4 kPa) to 50 mbar (6 kPa)           Media         Gases of families 1, 2, 3 and other neutral gaseous media           Ambient temperature         -15 °Ct to +70 °C (Do not operate MB-D below 0°C in liquid gas systems. Only suitable for gaseous liquid gas, liquid hydrocarbons destroy sealing materials.)           Dirt trap         Fine-mesh sieve. Replacement only possible by dismounting the fitting.           Pressure switches         Types GW A5, ÜB A2 / NB A2 to DIN EN 1854 may be attached. For further information, refer to Datasheets 5.02 and 5.07 °Pressure Switches for DUNGS Multiple Actuators'           Pressure regulator         Pressure regulator compensated for residual pressure, leakproof seal when switched off by means of valve V1 as per DIN EN 88 Class A. Setpoint spring permanently installed (no spring exchange possible). A vent line above roof is not required. Internal pulse tap provided.           Solenoid valve V1         Valve as per DIN EN 161 Class A Group 2, fast closing, fast opening           Walve as per DIN EN 161 Class A Group 2, fast closing, flast opening with mb-ZRD.
